Notes

Ferrex plc is an AIM quoted exploration and development company focused on advancing low capex iron ore and manganese projects in Africa through the development cycle and into production. Our current property portfolio comprises the Nayega manganese project in Togo where the company is steadily progressing with development plans, iron ore at Mebaga in Gabon and Malelane in South Africa and manganese at Leinster in South Africa.

The Company's growth strategy is centred on advancing its current assets, utilising its Board and management team's considerable experience in developing resource projects across Africa and expanding its portfolio through acquisitions to build Ferrex into a mid-tier, low-cost producer of iron ore and manganese.
