**Notes**

Keras Resources plc is an AIM quoted, resource development company. The Company is focussed on advancing lowest quartile, low capex deposits which benefit from proximal established infrastructure up the development curve and into production. Keras plans to commence production at its Australian Gold Project in Q2 2016 and then use this cash flow towards to expand gold production further.

At Nayega, Keras has concluded a Bankable Feasibility Study and awaits award of the mining permit. The Bankable Feasibility Study indicates that Nayega could produce 250,000 tonnes per year of manganese concentrate at 38%. The Company will investigate bringing the mine into production on grant of the mining permit to generate further cash flows for the Company.

The Company also holds iron ore and manganese projects in Gabon and South Africa and is actively assessing ways to realise value from these assets.

Keras has 1,193,794,390 shares in issue. The Directors have subscribed for and purchased approximately 25.0% of the issued share capital of the Company and are therefore aligned with shareholders' interests.

**Glossary**

A\$ – Australian dollar

Au – gold
